Touchcore Technologies
Lagos, Lagos

Web Developer

Currently work as a Node JS developer. My job here is to:
· Draw a detailed workflow of every
project

· Identify user and
system requirements for new websites and applications

· Prioritize software
development projects, setting timelines and assigning tasks to team members
where necessary

· Create wireframes to
decide on layout

· Troubleshoot, test
and maintain the core product software and databases

· Write efficient code

· Creating websites/a website using
standard HTML/CSS practices

· Implementing contingency plans in
case the website goes down

· Maintain and expand/enhance
the website once built
